## Butterfly Word Wall

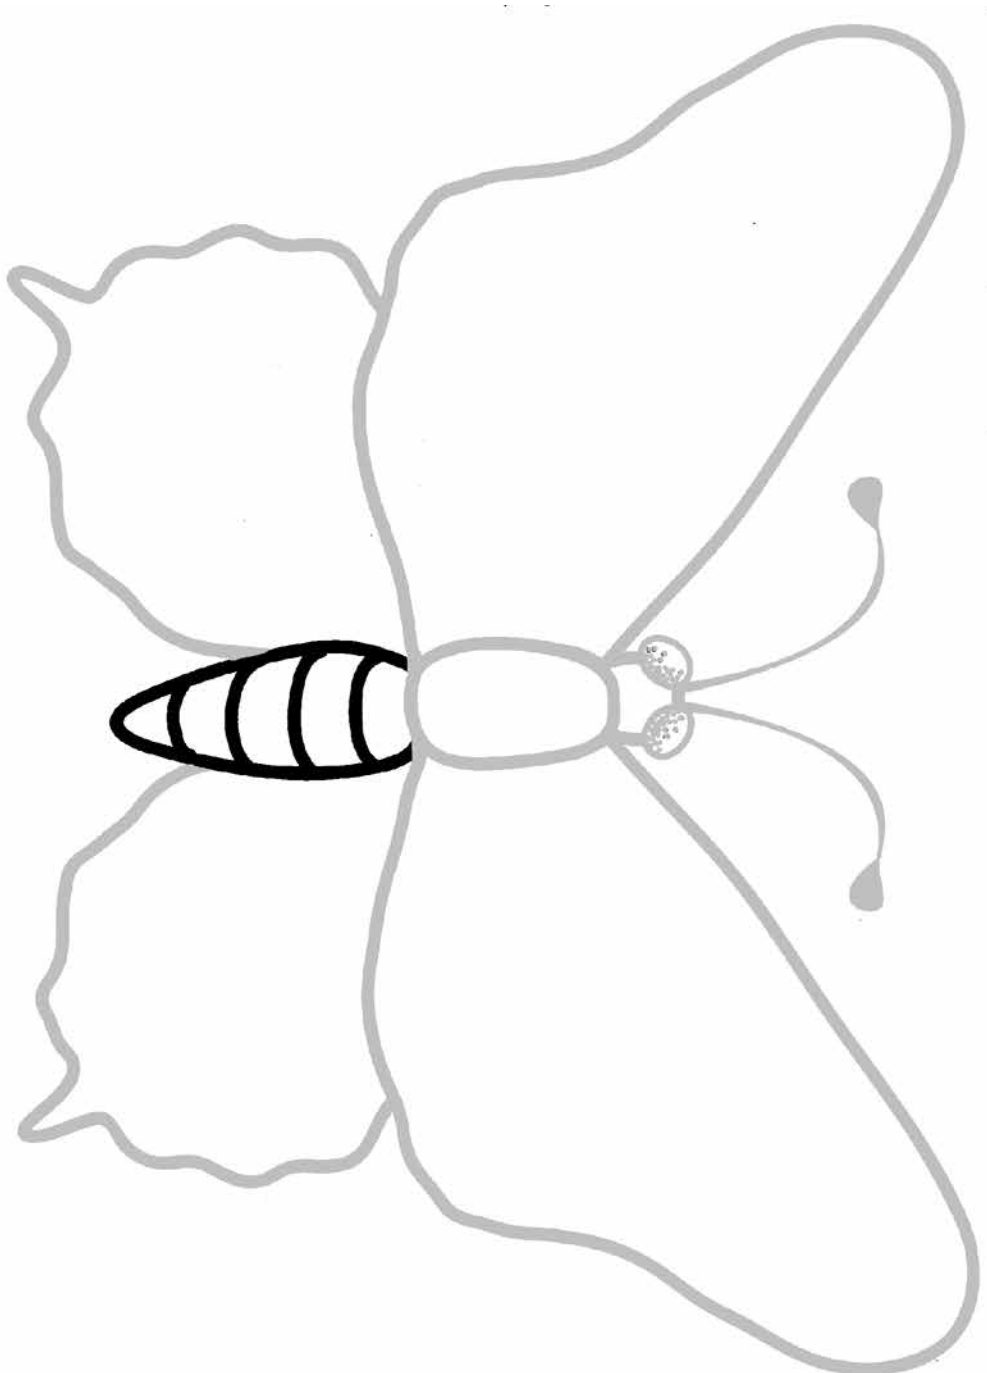

The Word Wall is a set of domain-specific words that are all related to butterflies, insect body parts, and pollination. Select the words that are useful to your students.

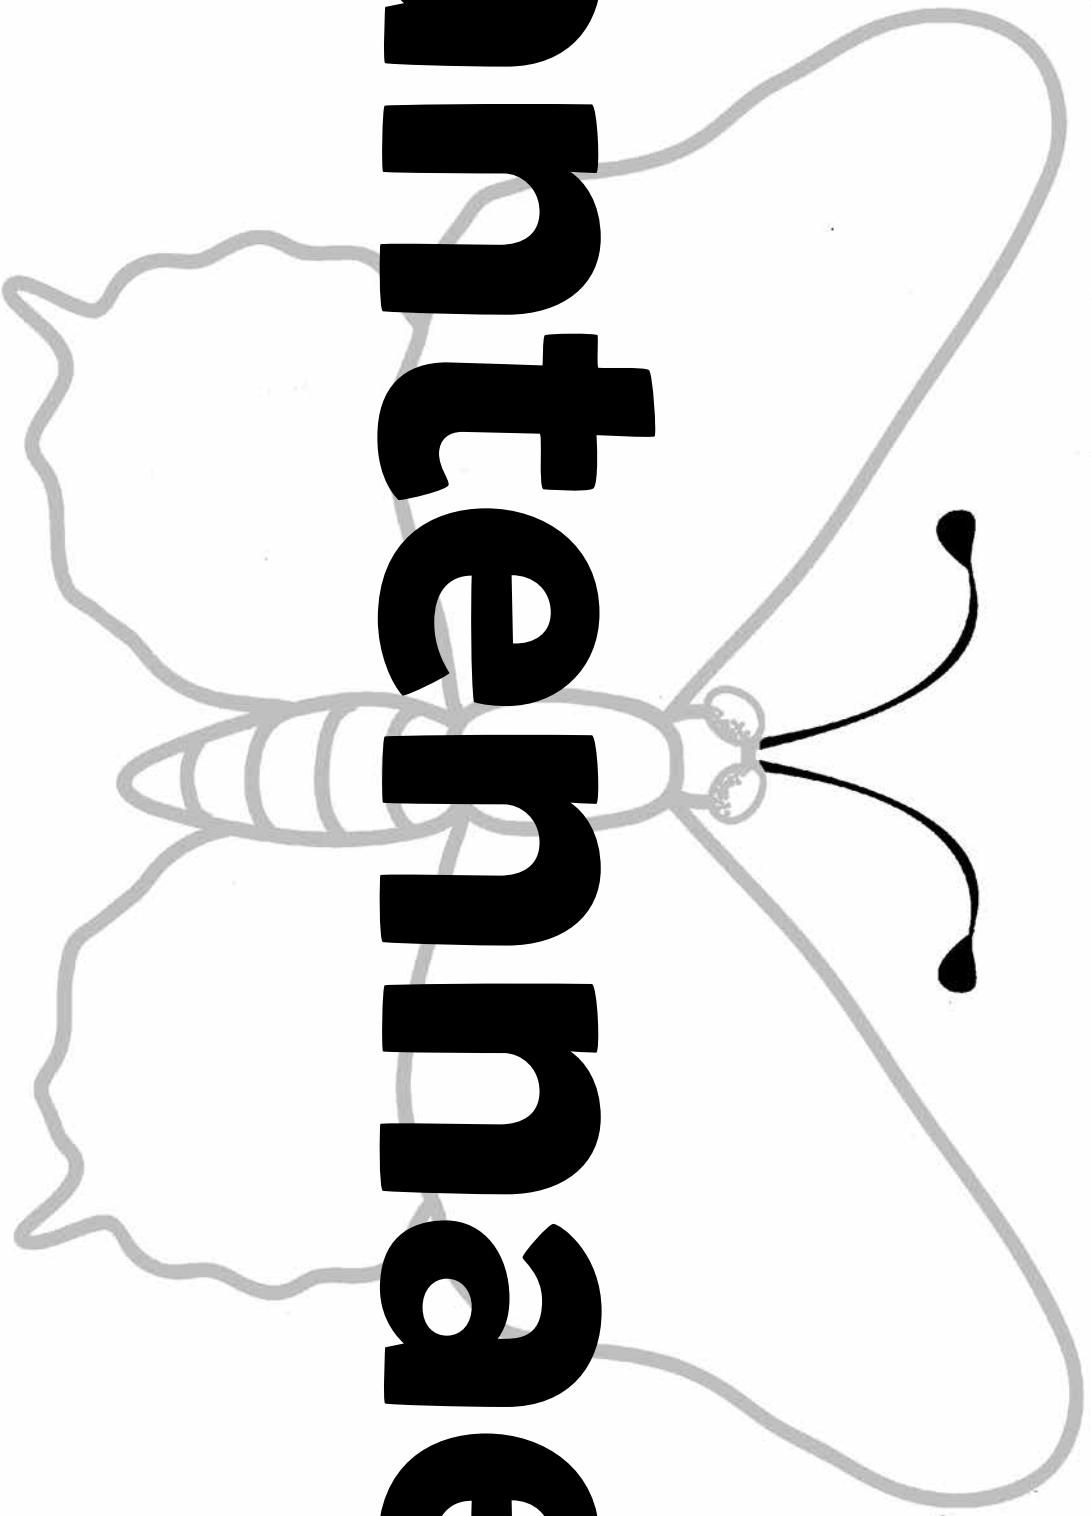

Here are ideas for using the Word Wall:

- **Tracing** - have your students trace the letters of each word with a finger. The students can say the letter out loud or silently. Pronounce the whole word at the end.
- **Act It Out** - as you go through the words, act out the meaning with your hands or your whole body. Especially good for kinesthetic learners.
- **Relate to Live Caterpillars & Butterflies** - as your caterpillars grow and transform, encourage the children to use these vocabulary words to describe what they see.
- **Use in a Sentence** - have your students use the words in a sentence. Do it as a writing assignment or spoken out loud.

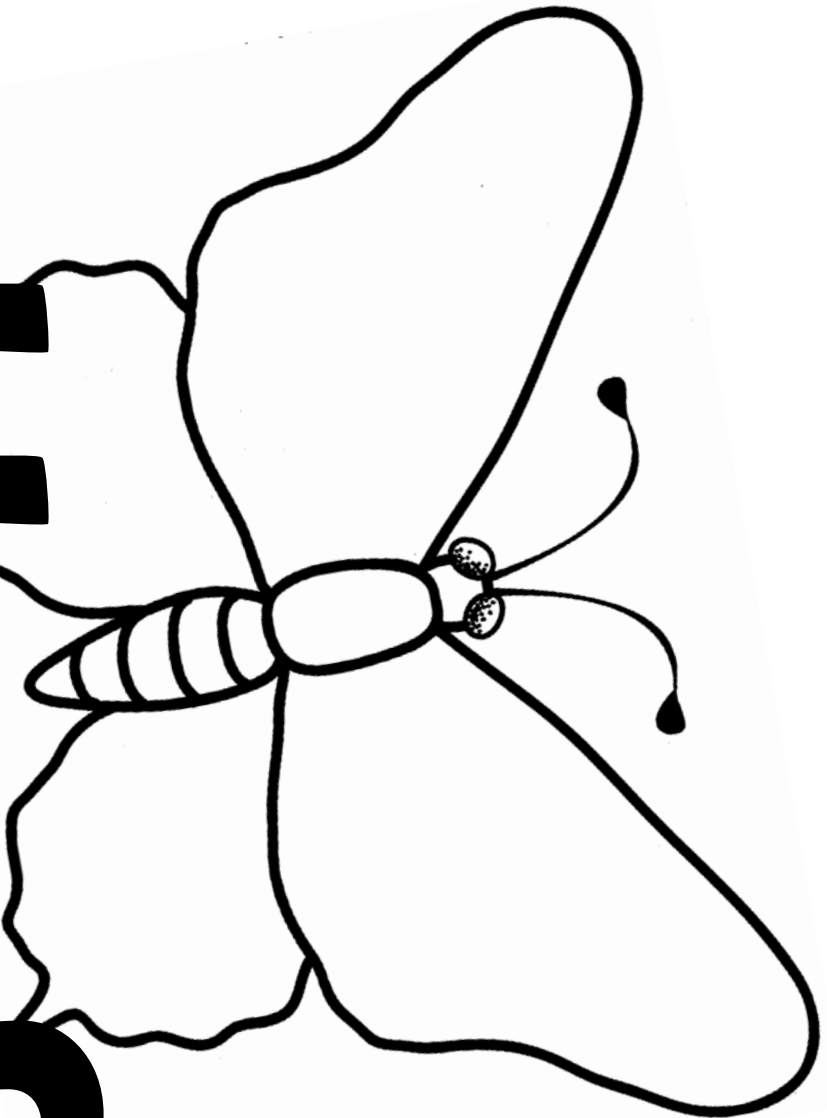

# abdormen

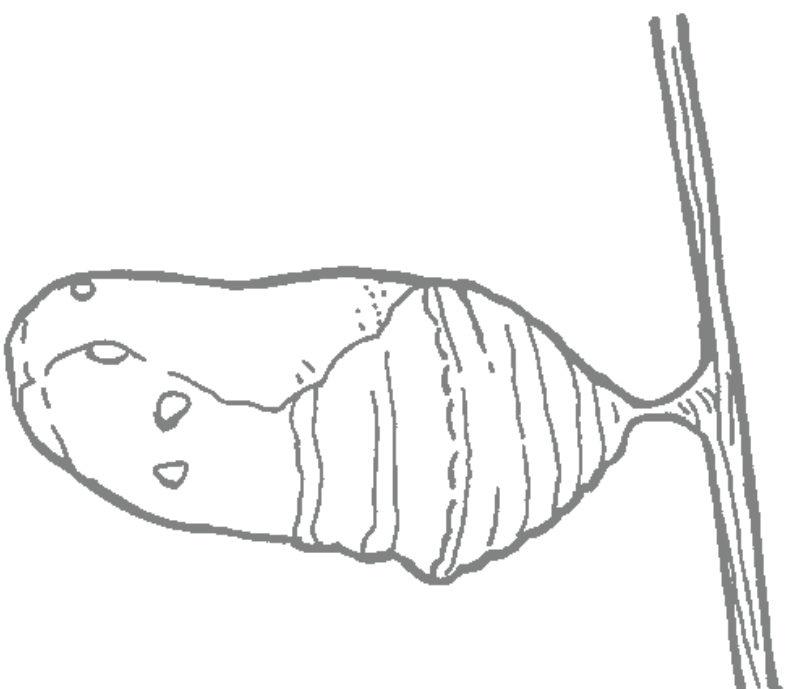

# antennae

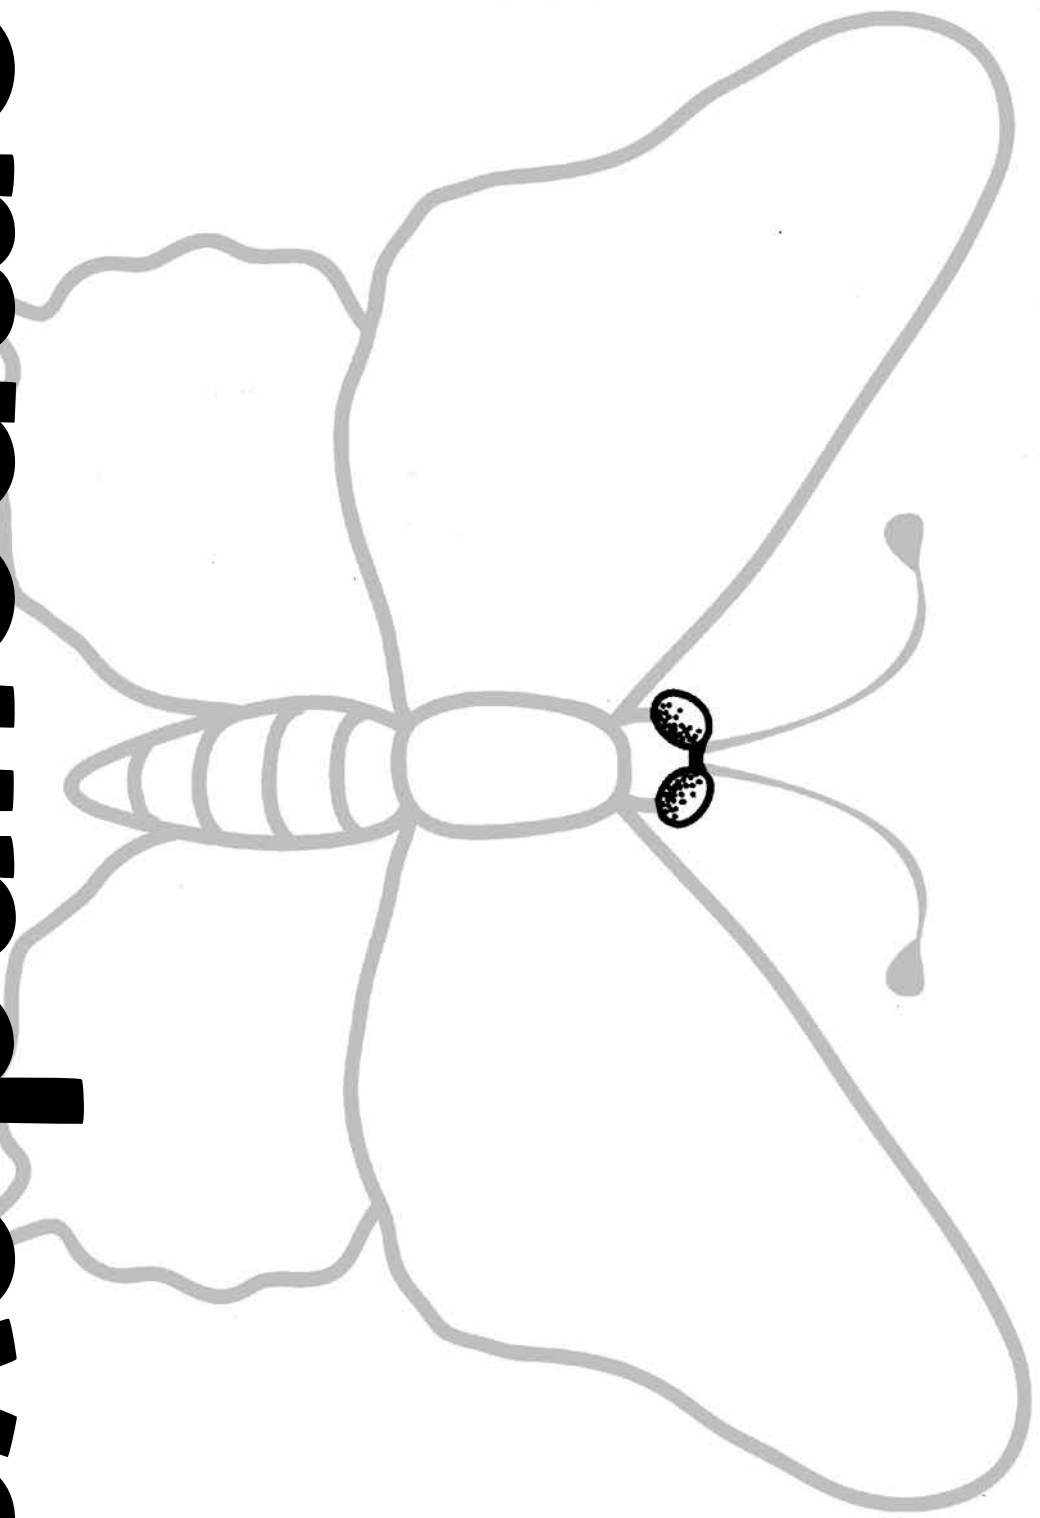

# Butterfly

# chrysalis

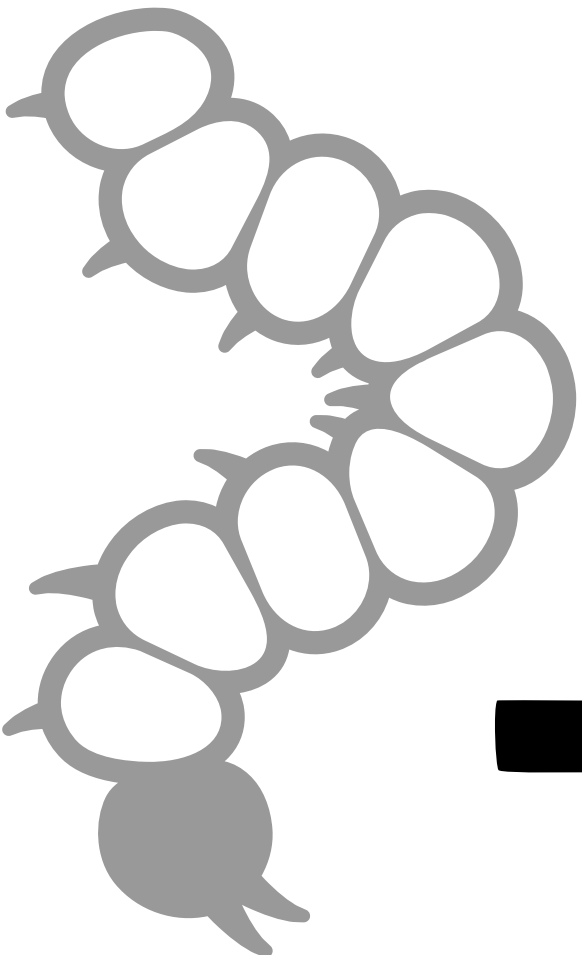

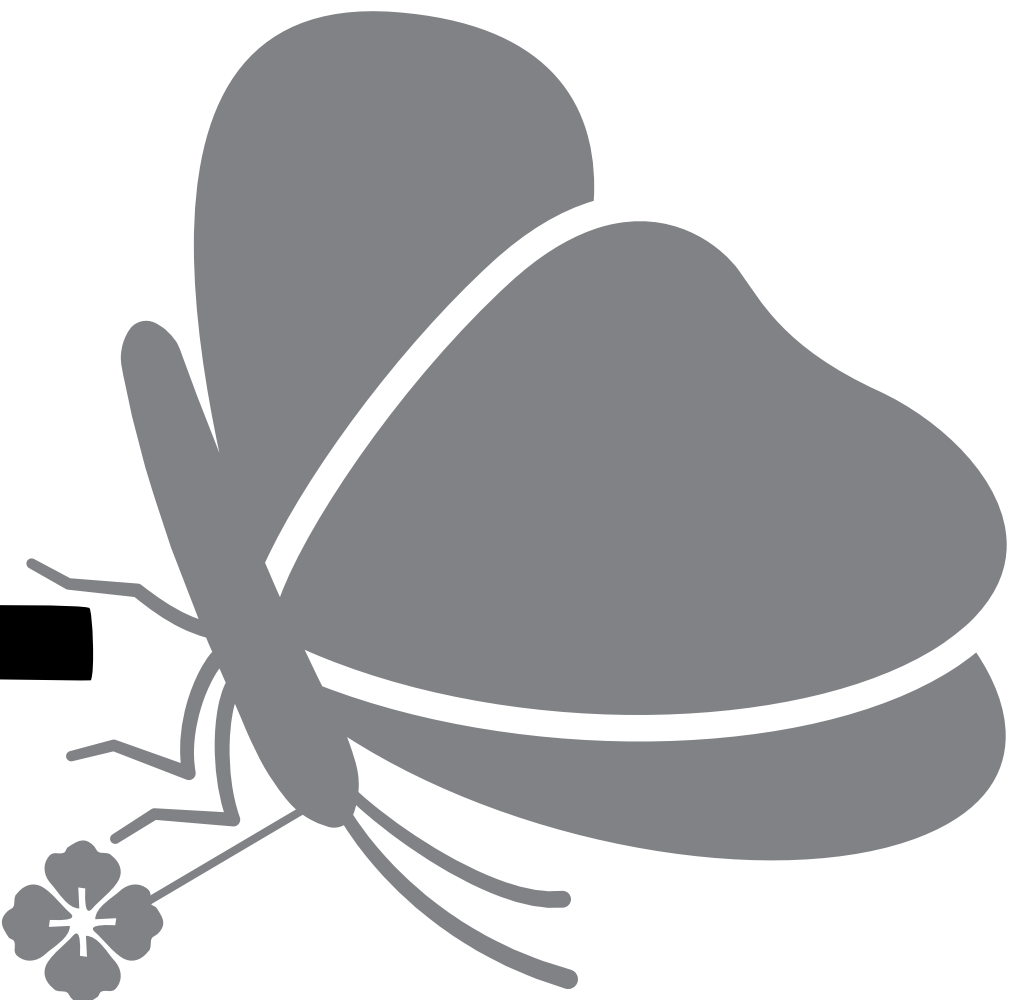

# compound eyes

# crawling

# caterpillar

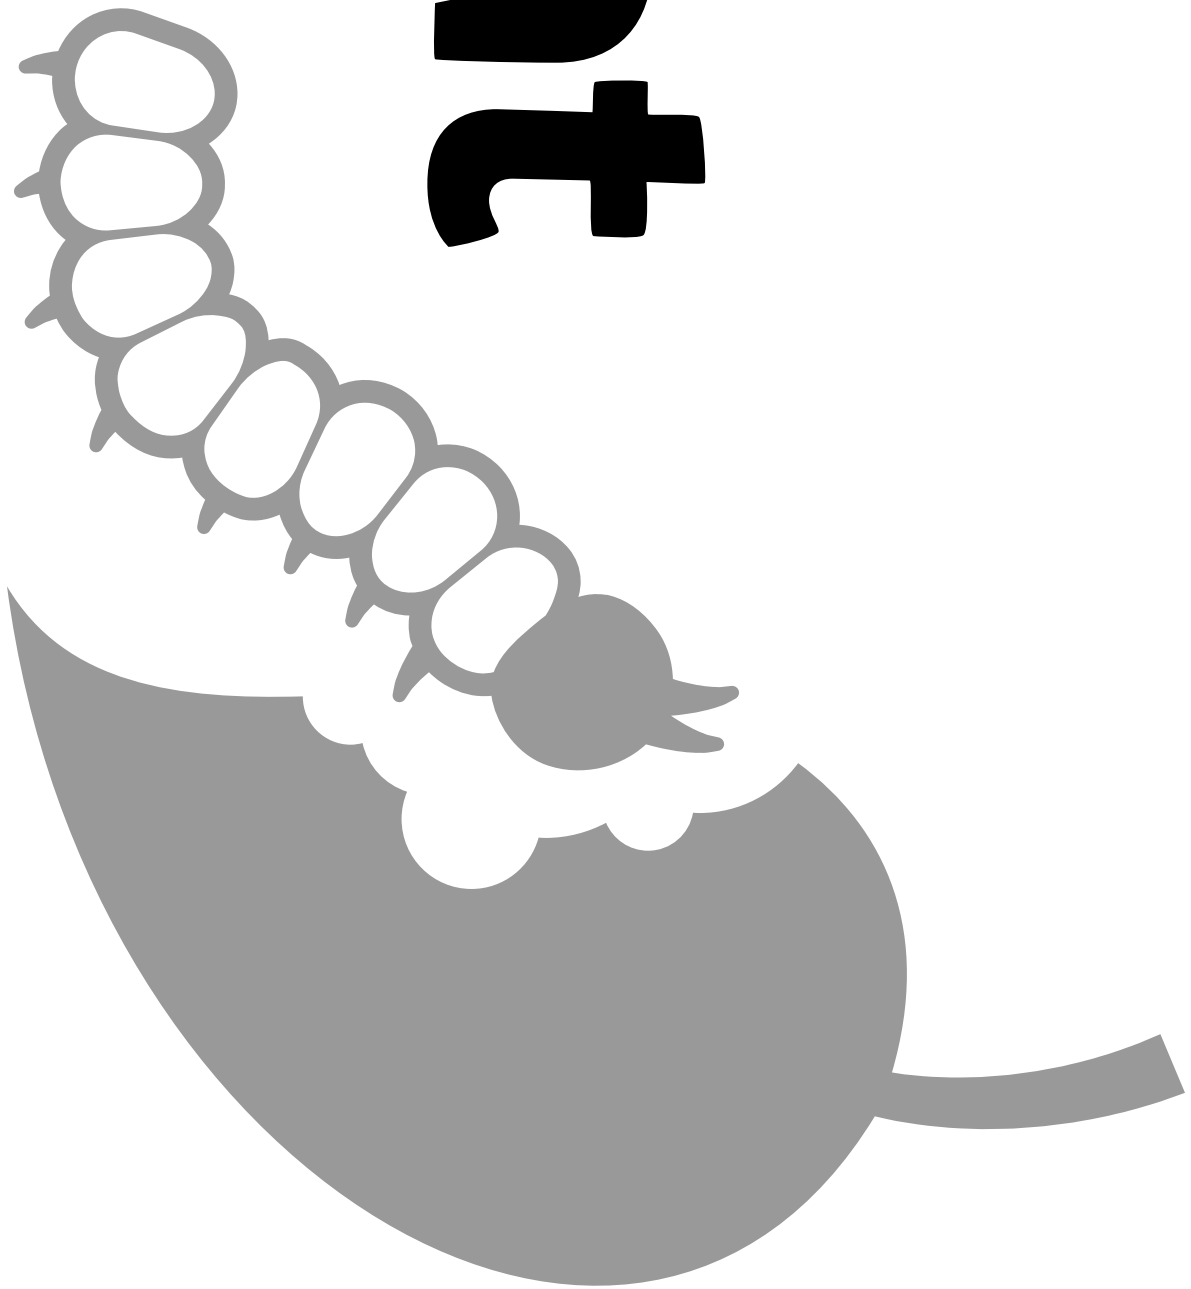

**drink**

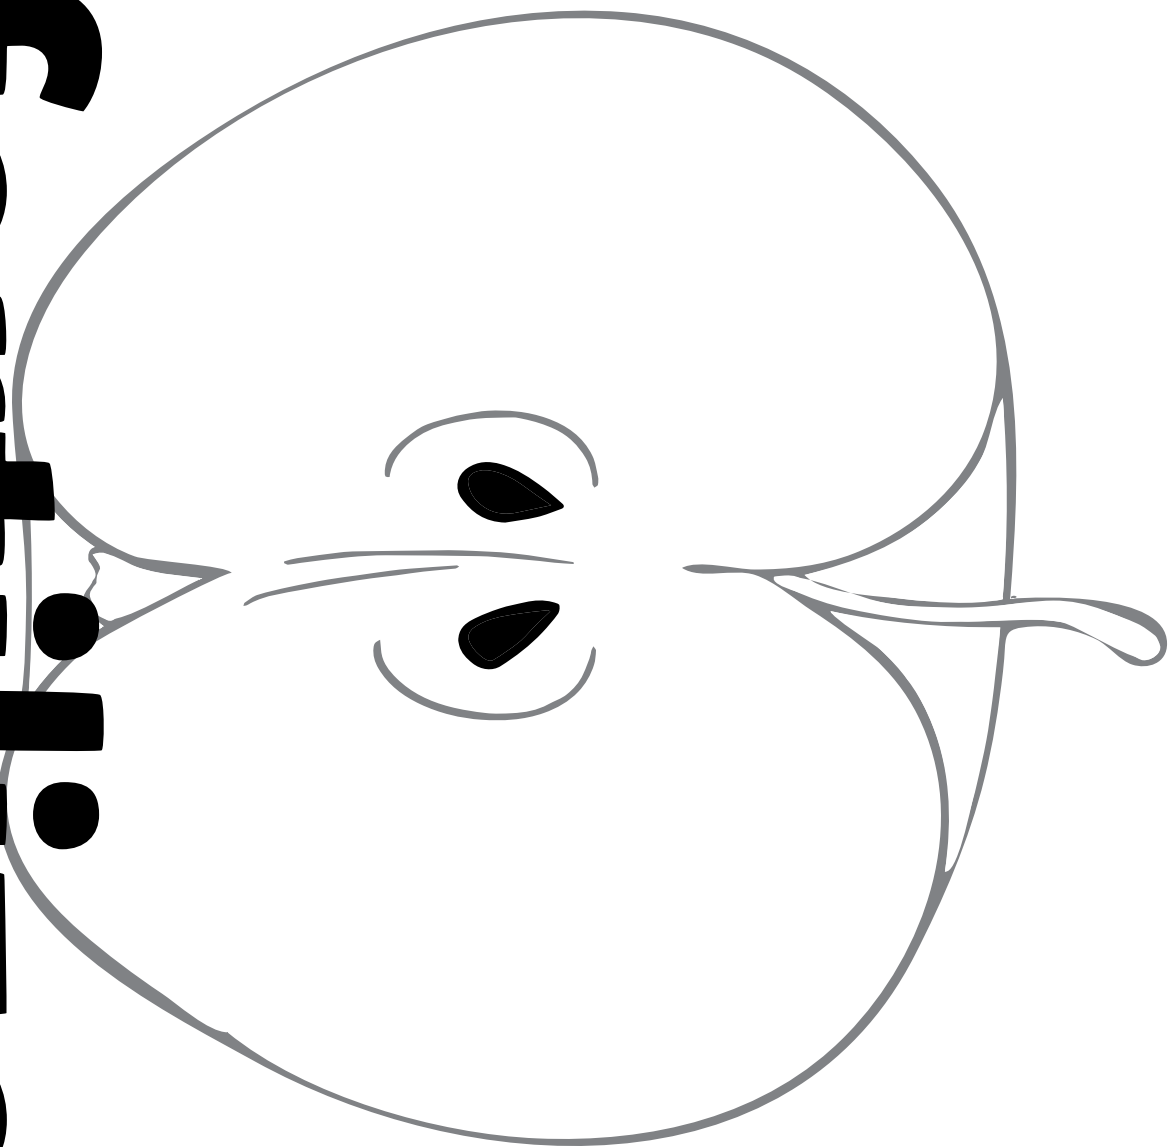

**eat**

# emerge

**fertilize**
